The CADLearning Education Solution

Featuring over 35,000 lessons on more than 40 Autodesk programs, CADLearning offers your students the most comprehensive library of Autodesk learning content.

Individualized learning experiences gamify the process with a series of badges and medallions. Breaking down content into smaller, more attainable segments keeps students motivated.

Assessments target content to students' knowledge gaps, providing just what they need to avoid redundant learning.

CADLearning can be used to:

- Empower students to learn at their own pace
- Prepare for Autodesk Certification Exams
- Maximize learning potential with personalized assessments
- Promote natural curiosity with lessons on features and functions not covered in class
- Complement classroom instruction with on-demand learning

What's Included?

- Unlimited access to the full CADLearning Library
- Student activity reporting with assessment grading
- Frequently updated content published in alignment with Autodesk dot releases
- Access to CADLearning Assist with contextual lesson suggestions as students work in a supported Autodesk software program
- Assessments to help identify and fill skills and knowledge gaps
- Goal-based learning paths that align with Autodesk Certification Exam objectives
- Exercise files for hands-on practice

*Thank you, teachers,
for all you do.*
